

Criteria — LegalTech AI Platform Requirements

1. Company Overview

- **Brand:** Criteria (LegalTech AI for SMEs & Startups)
 - **Tagline (example):** "AI-Powered Legal Intelligence for Modern Businesses"
 - **Target Audience:** SMEs, startups, and growing businesses that need affordable, AI-driven legal support
-

2. Tech Stack

Layer	Technology
Framework	React 18 (functional components + hooks)
Build Tool	Vite
Styling	Bootstrap 5 + custom CSS overrides
Routing	React Router v6
SEO	react-helmet-async for per-page meta tags
Forms	React Hook Form + Zod validation
Icons	Bootstrap Icons or React Icons
Animations	AOS (Animate on Scroll) — lightweight
HTTP	Axios (for future API integration)

3. Design & Branding

Visual Identity

- **Vibe:** Professional & Conservative with a modern tech edge
- **Primary Color:** Dark Purple (#2D1B69)
- **Accent Color:** Electric Blue (#0055FF)
- **Neutrals:** White (#FFFFFF), Light Gray (#F8F9FA), Dark Gray (#343A40)
- **Typography:**
 - Headings: Serif (e.g. Playfair Display or Merriweather) — conveys tradition & trust
 - Body: Sans-serif (e.g. Inter or Plus Jakarta Sans) — clean & readable
- **Dark Mode:** Optional, via CSS custom properties + Bootstrap 5 dark mode toggle

Design Principles

- Mobile-first, fully responsive (xs through xxl breakpoints)
 - Generous whitespace for readability
 - Consistent spacing scale (8px grid)
 - Clear visual hierarchy with distinct section backgrounds (light gray alternating with white)
-

4. Sitemap & Routes

Route	Page	Description
/	Home	Hero, trust bar, feature cards, how-it-works, testimonials, final CTA
/about	About Us	Mission, story, team, company values
/services	Services	Grid catalog of all 8 AI legal services with category filter
/services/:slug	Service Detail	Deep-dive per service: description, features, benefits, pricing, CTA
/pricing	Pricing	3-tier plan comparison (Basic / Pro / Enterprise) with monthly/annual toggle
/blog	Blog	Article card grid with pagination and category sidebar
/blog/:slug	Blog Post	Full article with author, date, related posts
/faq	FAQ	Searchable accordion of common questions
/contact	Contact	Inquiry form + email, phone, address, business hours
/demo	Demo Request	Book a demo form with date/time picker
/careers	Careers	Job openings list + application instructions
/resources	Resources	Whitepapers, guides, case studies, downloadable PDFs
/*	404	Friendly not-found page with navigation help

5. Services (AI-Powered Legal Tools)

All eight services to be featured on the Services page and individually on Service Detail pages:

1. **Contract Review** — AI-assisted contract analysis, clause extraction, risk flagging
2. **Legal Research** — AI-powered case law, statute, and regulatory search
3. **Document Automation** — Auto-generation of contracts, NDAs, terms of service
4. **Due Diligence** — AI-driven M&A and compliance due diligence reports
5. **Compliance Monitoring** — Real-time regulatory compliance tracking and alerts
6. **Litigation Analytics** — Predictive analytics for case outcomes and judge history
7. **AI Legal Assistant** — Conversational chatbot for client intake and Q&A
8. **E-Discovery** — AI-powered electronic discovery and document classification

6. Page-by-Page Component Breakdown

6.1 Global Components

- **Navbar** — Sticky, responsive, hamburger on mobile, smooth scroll to page sections, active link highlighting
- **Footer** — Multi-column: quick links, services list, social icons, newsletter signup input
- **SEO Head** — Per-page title and meta description via `react-helmet-async`
- **Scroll To Top** — Button appears on scroll down
- **Breadcrumbs** — On interior pages (Services, Blog, Resources)

6.2 Home Page

- **Hero Section** — Headline ("Legal Intelligence, Powered by AI"), subtitle, two CTA buttons ("Get Started" / "Book a Demo"), optional background graphic
- **Trust Bar** — Client logos, partner badges, certification icons (horizontal scroll)
- **Value Props** — 3–4 feature cards: Speed, Accuracy, Affordability, Accessibility
- **How It Works** — 3-step numbered process (Upload → AI Analyze → Get Results)
- **Testimonials** — Carousel/slider with client quotes, avatar, company name
- **Final CTA** — Banner with headline + button ("See Plans & Pricing")

6.3 About Page

- **Mission Statement** — Company vision and purpose
- **Story Section** — How and why CriterIA was founded
- **Team Grid** — Photos, names, roles, short bios
- **Values** — List of core values with icons

6.4 Services Page

- **Header** — Page title + short intro paragraph
- **Filter Tabs** — "All" / "Contract" / "Research" / "Compliance" / etc.
- **Service Card Grid** — Each card: icon, title, 1-line description, "Learn More" link
- **CTA Banner** — "Not sure which service fits? Contact us."

6.5 Service Detail Page

- **Hero** — Service name, icon, short description
- **Feature List** — Bullet points with check icons
- **Benefits Section** — How this service helps SMEs/startups
- **Pricing Snippet** — Starting price or link to pricing page
- **CTA** — "Try it Now" / "Book a Demo"

6.6 Pricing Page

- **Toggle** — Monthly / Annual billing (show % savings on annual)
- **Plan Cards** — 3 tiers: Basic (starter), Pro (most popular), Enterprise (custom)
 - Each card: plan name, price, bullet feature list, CTA button
 - "Most Popular" badge on Pro card
- **FAQ** — Collapsible questions about billing, refunds, upgrades

6.7 Blog Page

- **Card Grid** — Featured image, title, excerpt, date, category tag, "Read More"
- **Pagination** — Numbered page buttons at bottom
- **Sidebar** — Categories list, recent posts, search input

6.8 Blog Post Page

- **Article** — Full content with images, blockquotes, code blocks if applicable
- **Meta** — Author name + avatar, publish date, read time
- **Share Buttons** — LinkedIn, Twitter, Copy Link
- **Related Posts** — 2–3 cards at bottom
- **Comments** — Optional (disabled initially, can add later)

6.9 FAQ Page

- **Search Bar** — Filter questions by keyword
- **Accordion** — One question open at a time, smooth expand/collapse
- **Categories** — Grouped sections (e.g. Billing, Platform, Security)

6.10 Contact Page

- **Form** — Name, Email, Phone, Company, Service Interest (dropdown), Message (textarea)
- **Contact Info** — Email, phone, physical address, business hours
- **Map** — Optional embedded Google Map

6.11 Demo Request Page

- **Form** — Name, Email, Phone, Company Size, Service Interest (multi-select), Preferred Date/Time, Message
- **Confirmation** — Thank-you message after submission

6.12 Careers Page

- **Header** — "Join the Team" + culture blurb
- **Job Listings** — Accordion or expandable cards per role (title, location, type, description)
- **Apply CTA** — Link or email for applications

6.13 Resources Page

- **Filter** — By type (Whitepaper, Guide, Case Study) or topic
- **Resource Cards** — Thumbnail, title, description, download button (PDF)

6.14 404 Page

- **Illustration** — Simple graphic
 - **Message** — "Page not found" + suggestion links (Home, Services, Contact)
-

7. UX & Interaction Requirements

States Per Component

- **Loading**: Skeleton screens or Bootstrap spinners for async content
- **Empty**: Graceful fallback text (e.g. "No blog posts yet — check back soon")
- **Error**: Inline validation on forms, friendly error banners for server issues
- **Edge Cases**: Long service names truncate gracefully, very long dropdowns scroll

Responsiveness

- Mobile-first breakpoints: xs (<576), sm (≥576), md (≥768), lg (≥992), xl (≥1200), xxl (≥1400)
- Navbar collapses to hamburger on md and below
- Card grids: 1 col on xs, 2 on md, 3–4 on lg+
- Tables (pricing): stacked cards on mobile instead of columns
- Forms: full-width inputs on mobile, inline on desktop

Accessibility

- Semantic HTML (`<nav>` , `<main>` , `<section>` , `<article>` , etc.)
 - ARIA labels on interactive elements
 - Keyboard-navigable menus and accordions
 - Alt text on all images
 - Color contrast ratio ≥ 4.5:1 for text
-

8. State Management & Data

- **Static Content**: Page data stored in `/src/data/` as structured JSON/JS files (no CMS needed for v1)
- **Global State**: React Context for theme toggle (dark/light) and optional user session

- **Form State:** React Hook Form + Zod schema validation
 - **API Layer:** Axios instance prepared for future backend; mock data in development
-

9. Performance & Build

- **Code Splitting:** `React.lazy` + `Suspense` for every page route
 - **Image Optimization:** Use `vite-imagemetools` or WebP format with `<picture>` fallbacks
 - **Bundling:** Vite's default Rollup config with manual chunk splitting for vendor libs
 - **Caching:** Hash-based filenames (Vite default) for cache busting
 - **SPA Fallback:** `404.html` or server config for client-side routing on static hosts
 - **Lighthouse Target:** ≥ 90 on Performance, Accessibility, Best Practices, SEO
-

11. Future Enhancements (v2+)

- CMS integration (Contentful / Sanity / Strapi) for blog & resources
- Client authentication portal
- Live AI Chatbot widget on all pages
- Multi-language support (i18n)
- Analytics dashboard (usage metrics for enterprise clients)
- E-signature integration (DocuSign / HelloSign)
- Payment gateway (Stripe) for subscription billing
